

AIT Summer Program 2014: Program Objective and Fees

I. Program

AIT is offering a special two-week summer program for both undergraduate and graduate students interested in an international career in engineering, technology, environment, sustainable development and management fields.

II. Program Objectives and offerings The summer program will be of interest for those who

- desire to enrich their knowledge and skills in the overall concept of sustainability,
- would like to be kept abreast of the advances and applications in engineering, technology, environment, development and management, and
- are keen to work in an international environment and upgrade their communication skills.

The Program will include lectures, hand on work and site visit

AIT faculty, staff, students and invited experts will deliver lectures, introduce academic and research work at AIT, in the following fields:

a) School of Engineering and Technology (SET)

Civil and Infrastructure Engineering (CIE)
Information, Communication and Technology (ICT)
Industrial System Engineering (ISE)

b) School of Environment, Resources and Development (SERD)

Sustainable Food Production, Technology and Management (SFPTM)
Energy and Environment (EE)
Society, Resources and Development (SRD)

c) School of Management (SOM)

Entrepreneurship, Technology Management, Sustainable Business, Finance, Human Resource, Marketing, Strategy, International Management

III. Program Fees: 2,000 US Dollars

The program fee includes accommodation in/near campus; meal coupons; course materials; field visits; airport pickup and drop-off; and medical insurance. Participants will take care of their travel/flight tickets, visa fees, and all other personal expenses.

IV. Application deadline: 30 April 2014.
